

**Journal of
Discrete Mathematical Sciences & Cryptography**

Index of Volume 1 (1998)

Number 1, April

| | |
|--|--------|
| S. INNAMORTAI : The non-existence of certain large minimal blocking sets | 1–26 |
| M. ZANNETTI : Note on a characterization of projective planes | 27–28 |
| G. MONACO AND A. MONACO : Development of a determinant in function of the differences among the elements of each line | 29–47 |
| N. FAGHIH AND M. NAMAZI : Applying Shannon’s information theory to the measurement and anlysis on financial statements | 49–62 |
| C. CREVATO AND A. SGARRO : General lower bounds for chosen-content attacks against authentication codes | 63–72 |
| S. K. PRASAD : On fuzziness in a probability space | 73–77 |
| V. R. KULLI, B. JANAKIRAM AND R. R. IYER : Split bondage number of a graph | 79–84 |
| P. NATH, M. M. KAUR AND R. SINGH : Some derivations of the Shannon entropy | 85–100 |

Number 2-3, August-December

| | |
|--|---------|
| R. AMERI AND M. M. ZAHEDI : Fuzzy direct sum and fuzzy (weakly) prime and primary subhypermoudles | 101–116 |
| L. BERARDI AND F. ZUANNI : On minimal blocking sets in non-symmetric designs | 117–125 |
| O. FERRI AND S. FERRI : Graphic characterization of quadric cones in a Galois space $PG(3, q)$ | 127–131 |
| B. BASAVANAGOUD : Quasi-total graphs with crossing numbers | 133–142 |
| F. MERCANTI AND E. GELSOMINI : Some topological properties of the nets of multichannel digital systems | 143–149 |
| N. FAGHIH : Some empirical investigations of the auto-correlation function extrapolation | 151–196 |
| <i>Index of Volume 1 (1998)</i> | 197–198 |
