

**Journal of  
Discrete Mathematical Sciences & Cryptography**

**Index of Volume 3 (2000)**

**Number 1-3, April-December**

G. MORGARI, O. STEILA AND M. ELIA : On the complexity of product sequences of linear recurring sequences	1-9
H. CHANDRASHEKHAR AND M. NAGARAJ : Key-lock pair mechanism for access control using tribes of Farey fractions	11-22
K. K. DAS AND N. BHATTACHARJEE : Some aspects of modified factorial series distributions	23-40
M. ELIA, J. C. INTERLANDO AND R. PALAZZO, JR. : Computing the reciprocal of units in Galois rings	41-55
B. K. MANGARAJ, U. APARAJITA AND A. MISHRA : Fuzzy set in product planning decision	57-81
A. MATURO : Fuzzy events and their probability assessments	83-94
H. CHANDRASHEKHAR AND M. NAGARAJ : Discrete quaternion Fourier transform in signal processing systems	95-112
R. RATAN AND P. K. SAXENA : Image processing based techniques for securing documents	113-129
S. ARUMUGAM AND J. S. SUSEELA : On graphoidal graphs	131-137
V. RADHAKRISHNAN, T. C. VENKATESAN AND K. KRITHIVASAN : Exact and approximate matching of matrix languages	139-156

S. K. PAL AND P. K. SAXENA : Enhancement of highly noisy speech signals	157–172
MD. A. U. KHAN : The corruption prevention model	173–178
S. MUKHOPADHYAY : A decision support system for medical diagnosis	179–192
S. MUKHOPADHYAY AND M. K. SINGH : A approximate solution of an unbalanced transportation problem	193–202
M. J. RYAN : The distribution model the more for less (noting) paradox and economies of scale and scope : some nonlinear extensions	203–211
K. S. CHANG, S. KIM AND I. YOO : Translation theorem of condition Yeh-Wiener integrals	213–225
H. M. SERAG : Distributed control for cooperative systems governed by Schrodinger operator	227–234
M. BIDKHAM AND K. K. DEWAN : Some extremal problems of polynomials	235–242
A. CAMBINI AND L. MARTEIN : Second order optimality conditions	243–252
R. C. MITTAL : Orthogonal wavelets	253–262
<i>Index of Volume 3 (2000)</i>	263–264
