

**Journal of
Discrete Mathematical Sciences & Cryptography**

Index of Volume 4 (2001)

Number 1, April

- A. LOURDUSAMY AND S. SOMASUNDARAM : Pebbling $C_5 \times C_5$ using linear programming 1–15
- M. M. ZAHEDI AND M. R. KHORASHADI-ZADEH : Some categoric connections between fuzzy hypergraphs, sub-hypergroups, graphs, subgroups and subsets 17–32
- F. EUGENI AND R. MASCELLA : A note on generalized Fibonacci numbers 33–45
- E. FOUNDAS : Some results of black's permutations 47–55
- V. R. KULLI, B. JANAKIRAM AND R. R. IYER : Regular number of a graph 57–64
- F. FABRIS : Sharpening the Gilbert-Varshamov bound in the finite case 65–75
- R. MURALI AND K. S. HARINATH : Laceability and distance graphs 77–86
- H. ÖZAKTAŞ, M. Ç. PINAR, M. AKGÜL, T. KURÇ AND C. AYKANAT : An algorithm with long steps for the simultaneous block projections approach for the linear feasibility problem 87–108

Number 2-3, August-December

V. R. KULLI AND N. S. WARD : On the total closed neighbourhood graph of a graph	109–114
K. H. HSUEH, P. S. CHEN, P. CHU AND J. K. H. LIU : The procedure for synthesizing ratio judgements	115–120
F. EUGENI AND M. ZANNETTI : Generalized configurations	121–131
A. SGARRO : Blind coding: authentication frauds from the point of view of rate-distortion theory	133–150
V. R. KULLI AND M. S. BIRADAR : The blict graph and blict graph of a graph	151–162
Y. SINGH AND C. S. RAI : An information theoretic approach to blind source separation	163–175
Y. CHANG, G. LO FARO AND H. SHEN : Support sizes of completely decomposable triple systems	177–188
I. HONKALA AND T. LAIHONEN : On the probability of undetected error for binary codes used for combined correction and detection	189–197
<i>Index of Volume 4 (2001)</i>	199–200
