## CONTENTS

T. W. CHEN AND J. Y. LIN : Control design based on minimization of quadratic index with an observer-based structure	1-19
S. ARMENI, D. CHRISTODULAKIS, I. KOSTOPOULOS, Y. C. STAMATIOU AND M. XENOS : Secure information hiding based on computationally intractable problems	21-33
M. L. AGGARWAL AND S. GUPTA : Nested balanced incomplete block designs derivable from simplex codes	35-44
C. H. LIN, Y. S. YEH AND C. Y. LEE : Keyed/Unkeyed SHA-2	45-58
M. C. BHANDARI AND C. DURAIRAJAN : On the covering radius of Simplex codes	59-69
S. FERRI : On the irreducible cubics containing the maximum number of points of a Fano plane	71-75
M. ZANNETTI : A combinatorial characterization of quadric Veronesean	77-82
D. MARCU : A note on the balanced hypergraphs	83-84
H. KHEDDOUCI : A dual of 4-regular graph for $G \times C_{2n}$	85-96
R. A. BORZOOEI, P. CORSINI AND M. M. ZAHEDI : Some kinds of positive implicative hyper $K$ -ideals	97-108
D. PELUSI : Application of fuzzy logic to integrated circuits	109-120
