

Journal of Discrete Mathematical Sciences & Cryptography

VOLUME 7

NUMBER 1

APRIL 2004

ISSN 0972-0529

CONTENTS

M. ZANNETTI : A combinatorial characterization of Baer subspaces	1–3
B. BUCCIMAZZA, B. K. DASS AND S. JAIN : High-density-burst error detection	5–21
C. F. LU AND S. P. SHIEH : Re-keying algorithms for symmetric cryptosystems	23–27
F. D. GENNARO : Which blocking sets are hypergroups ?	29–36
L. P. RAI, N. KUMAR AND C. K. GOEL : Forecasting Internet demand using mathematical models	37–48
H. CHUNG, D. FERRERO, A. TAYLOR AND J. WARSHAUER : Diameter of path graphs	49–54
W. K. CHEN AND C. I. FAN : Blind one-time signature and its applications	55–69
Y. S. YEH AND T. S. TSUI : A concurrent multi-string matching from multi-text algorithm based on the algorithm of hamiltonian path problem and DNA computation	71–96
R. SELVAKUMAR AND P. BALASUBRAMANI : Kernel code and its controllability	97–101
M. YAMUNA AND N. SRIDHARAN : Every γ -excellent, γ -flexible graph is γ_{bi} -excellent	103–110
C. H. HSU AND M. C. LAI : A new cipher scheme based on one-way Hash function and IDEA	111–120
Y. M. TSENG : A cryptographic key assignment scheme for access control in a hierarchy with exceptions	121–132
