Journal of Discrete Mathematical Sciences & Cryptography

VOLUME 10 NUMBER 5 OCTOBER 2007 ISSN 0972-0529

CONTENTS

C. C. CHANG, C. Y. LEE AND Y. W. SU : A mutual authenticated key agreement scheme over insecure networks	603–612
V. R. KULLI AND R. R. IYER : Inverse total domination in graphs	613–620
F. O. IKPOTOKIN AND S. C. CHIEMEKE : Mathematical derivation of the multi-peg Tower of Hanoi algorithm	621–636
M. R. DARAFSHEH AND Y. FARJAMI : Calculating the set of orders of elements in the finite linear groups	637–653
H. C. CHEN : A simple optimal parallel algorithm for constructing a spanning tree of a trapezoid graph	655–660
B. J. PRASAD, T. T. CHELVAM AND S. R. CHELLATHURAI : Private domination number of a graph	661–666
T. T. CHELVAM AND B. J. PRASAD : Common point domination number	667–676
A. P. SANTHAKUMARAN AND J. JOHN : The edge Steiner number of a graph	677–696
P. V. REDDY AND M. PADMAVATHAMMA : An authenticated key exchange protocol in elliptic curve cryptography	697–705
F. J. OGWU, M. TALIB AND G. A. ADEROUNMU : The performance of TCP/IP over wireless ATM network	707–720
R. SWEETLY AND J. P. JOSEPH : Radio number of graphs of diameter three	721–730
