## CONTENTS

A. SUGANYA AND N. VIJAYARANGAN : Landau-Ramanujan keyed hash functions for message authentication	1–8
S. CHAKRABARTI AND R. K. KHANNA : A new visual cryptography scheme for STS based access structures	9–23
M. ELIA : Representation of primes as the sums of two squares in the golden section quadratic field	25–37
M. GAETA, G. IOVANE AND E. SANGINETO : A 3D geometric approach to face detection and facial expression recognition	39–53
J. WANG : The spectrum of nested group divisible designs of type $t^n$	55–65
S. S. SUNDARAM, A. NAGARAJAN AND M. A. KRISHNAN : Path point cover	67–71
D. A. MOJDEH : On the extending of $k$ -regular graphs and their strong defining spectrum	73–86
Y. T. CHANG, J. H. HSU AND S. S. YU : A sublinear time string prefix square detection algorithm	87–95
T. ALDERSON : Some generalizations of Rédei's theorem	97–106
H. EVANGELARAS AND C. KOUKOUVINOS : New light on certain two level designs using Gröbner bases	107–124
H. EVANGELARAS, C. KOUKOUVINOS AND E. LAPPAS : An efficient algorithm for the identification of isomorphic orthogonal arrays	125–132
C. C. CHANG AND J. S. LEE : An anonymous and flexible $t$ -out-of- $n$ electronic voting scheme	133–151
C. H. YANG AND S. J. WANG : Weighted bipartite graph for locating optimal LSB substitution for secret embedding	153–164
Y. K. ZHAO : A characterization of prefix $n$ -power words	165–176
D. A. MOJDEH AND N. J. RAD : Connected geodomination in graphs	177–186
R. MASCELLA AND L. G. TALLINI : Theory and design of $m$ -ary balanced codes which are invariant under symbol permutation	187–200
