## CONTENTS

- P. G. KAZANTZIS AND C. D. DESINIOTIS : Planar asymmetric periodic orbits in four dipole problem 237-253
- P. G. KAZANTZIS AND C. D. DESINIOTIS : Permissible three dimensional areas of motion surround planar equilibrium points in the four dipole problem 255-278
- K. K. DEWAN AND A. AHUJA : Turán-Type inequalities for polynomials with restricted Zeros -II 279-289
- S. BHATTACHARYA, R. A. MARTINS AND K. KUMAR : A practical, distribution-free approach to the classical newsboy inventory stocking problem for highly right-skewed but otherwise unknown demand distributions 291-302
- D. W. VERZI : Subset selection processes to identify significant input variables for nonlinear target functions 303-320
- M. R. PERATI, L. P. R. KUMAR AND D. M. REDDY : Approximate Markovian model for delay behavior of internet router under self – similar traffic input 321-329
- J. F. DING : Applying fuzzy AHP approach to assess key value activities for ocean freight forwarders in Taiwan 331-346
