

**JOURNAL OF
INTERDISCIPLINARY MATHEMATICS**

Index of Volume 9 (2006)

Number 1, February

P. NATH : On some sum form functional equations related to information theory	1–15
F. EUGENI AND G. IPPOLITI : A proof of the irrationality of π and the rational powers of e	17–20
W. TANVATANAGUL, I. NEKOONTOD, S. KHANABSAKDI, B. PLUBIN, S. CHOOPRATEEP, P. THANINPONG, S. KETSILP, W. MINSIN, N. LEKSAWAT AND W. CHITPAKDEE : Statistical analysis on the opinion of the people in Chiangmai and Lamphun provinces (Thailand) on the idea of fixing Sunday Buddhist sabbath	21–35
A. I. KECHRINIOTIS, K. S. ANASTASIOU AND B. A. KOTSOS : New forms of the Taylor's remainder	37–48
K. S. ANASTASIOU, A. I. KECHRINIOTIS AND B. A. KOTSOS : Generalizations of the Ostrowski's inequality	49–60
A. VANINSKY : Computational method of finding optimal structural change in economic systems: an input-output projected-gradient approach	61–76
C. W. CHEN AND T. S. LIOU : Evaluation and analysis of investment alternatives with different economic lives using fuzzy logic	77–97
H. A. EL-SAIFY : Optimal control problem for infinite order parabolic lag system	99–114
Y. THEODOROU AND P. ALEVIZOS : The fuzzy eigenvalue problem of fuzzy correspondence analysis	115–137
C. H. LAI AND F. H. F. LIU : Using scatter plots to identify efficient units: a heuristic approach to data envelopment analysis	139–147
P. DI GIRONIMO : Systems of elliptic equations in unbounded domains: an existence and uniqueness result	149–155
E. FOUNDAS AND A. VLACHOS : Pheromone models in ant colony optimization (ACO)	157–168

E. FOUNDAS AND D. DERPANIS : Taking decision with the help of black's permutation for imprecise – ordinal data	169–178
E. FOUNDAS AND A. VLACHOS : New approaches to evaporation in ant colony optimization algorithms	179–184
Y. T. CHANG, C. Y. LO, P. LEE AND H. T. CHAUG : The study of quantitative analysis for solving conflict problems among intelligent agents	185–205
S. M. STEFANOV : Minimizing a convex separable exponential function subject to linear equality constraint and bounded variables	207–226
<i>Book Reviews</i>	227–228

Number 2, June

C. A. COELHO, R. P. ALBERTO AND L. M. GRILO : A mixture of Generalized Integer Gamma distributions as the exact distribution of the product of an odd number of independent Beta random variables: applications	229–248
I. J. TANEJA : Generalized arithmetic and geometric mean divergence measure and their statistical aspects	249–266
D. E. HARRIS, R. MOSHER, S. GUPTA AND M. BAMPTON : GIS-based analysis of harp and hooded seal sighting locations on shore in the Southern Gulf of Maine	267–285
D. FISHER : Using research papers as a tool in teaching introductory statistics	287–295
C. A. COELHO : The joint characterization of discrete and continuous 'waiting times' through their reciprocal relationships	297–318
B. K. DASS, R. IEMBO AND S. JAIN : (1,2) optimal codes over GF(5)	319–326
M. L. GREEN, D. M. MONARRES AND R. J. SWIFT : An eigenvalue approach to the immigration-catastrophe process	327–346
A. KUSH, P. GUPTA AND R. KUMAR : Performance evaluation of associative based routing in Adhoc networks	347–361
S. MISRA AND S. K. PANDEY : A class of almost unbiased estimators in systematic sampling	363–371
A. KHURANA AND S. R. ARORA : The sum of a linear and a linear fractional transportation problem with restricted and enhanced flow	373–383

INDEX OF VOLUME 9 (2006)	603
P. SAXENA, K. K. DEWAN AND M. MUSTAFA : Data envelopment analysis: an application in the transport sector	385–395
P. DASS, L. BERARDI AND B. K. DASS : Difference equations and Rao-Hamming bound	397–403
J. SHABBIR AND S. GUPTA : On estimation of finite population variance	405–419
R. R. SAXENA : Enumeration technique for set covering problems: a combinatorial approach	421–430
Number 3, October	
W. TANVATANAGUL AND P. SALEEWONG : A statistical analysis of total soluble solid in pineapple fruits	431–444
C. CATTANI AND I. BOCHICCHIO : Wavelet analysis of chaotic systems	445–458
K. I. TAKAHASHI AND K. MD. M. SALAM : Mathematical model of conflict with non-annihilating multi-opponent	459–473
G. IOVANE AND M. CHINNICI : Stochastic self-similar processes and random walk in nature	475–498
M. R. MOLAEI : Relative vector fields	499–506
H. KH. ABDULLAH : On the oscillation of second order differential equations	507–513
T. NAKAI : A distinction among stable equilibria in a noncooperative game	515–526
J. KARAKONSTANTIS : The mechanism of structuring the concept of the derivative	527–541
L. BUONANNO : A new Gronwall-Bellman inequality for discontinuous functions	543–550
S. N. N. PANDIT, S. RAMAMURTHY AND B. K. GANDHI : Curve fitting when the curve may not be a function	551–568
F. O. IKPOTOKIN AND S. C. CHIEMEKE : Comparison of two generalized methods for solving multi-peg towers of Hanoi puzzles	569–580
I. J. TANEJA AND P. KUMAR : Generalized non-symmetric divergence measures and inequalities	581–599
<i>Book Review</i>	600
<i>Index of Volume 9 (2006)</i>	601–603
