Journal of Interdisciplinary Mathematics

VOLUME 13 NUMBER 1 FEBRUARY 2010 ISSN 0972-0502

CONTENTS

Z. MA, B. FORRESTER, Y. Y. REN AND T. HAMMOND : A computer-assisted mathematical image analysis method for quantifying gravitropic curvature in plant roots	1–15
A. GUTIÉRREZ AND H. ZHANG : A note about graphical representations to capture the consumer's perception of a brand	17–40
V. S. MANORANJAN AND I M. LEE : Analysis of a population model with efficient resource utilization	41–50
M. GEORGE AND K. S. ZEENATH : Matrix games in fuzzy environment	51–56
A. BUENROSTRO, K. DIAZ, C. P. GONZALES, M. GORRITZ AND D. W. VERZI : Modeling HIV and the infant immune response	57–76
E. YAŞAR AND T. ÖZER : On the conservation laws and traveling wave solutions to the BBM equation	77–86
A. M. SAFER : The effect of multiple anchors on the distribution of responses	87–93
O. KHADIR AND L. SZALAY : Sufficient conditions for factoring a class of large integers	95–103
P. K. SONTAKKE AND A. S. GUDADHE : Angular Hartley transform	105–111
P. T. ARTIKIS, C. T. ARTIKIS AND K. AGORASTOS : Incorporating concepts of extreme value theory in formulating a discounting model for making optimal decisions in competing risks management	113–124
