

Journal of Interdisciplinary Mathematics

VOLUME 14

NUMBER 4

AUGUST 2011

ISSN 0972-0502

CONTENTS

S. S. APPADOO, C. R. BECTOR AND S. K. BHATT : Possibilistic characterization of (m, n) -Trapezoidal fuzzy numbers with applications	347-372
A. ANBER AND Z. DAHMANI : The variational iteration method for solving the fractional coupled lotka-volterra equation	373-388
S. M. STEFANOV : Valid inequalities, cutting planes and integrality of the knapsack polytope	389-406
I. M. IZMIRLI : Categorizing musical pieces by their correlation coefficients	407-424
A. GUESMIA AND N. DAILI : Finite volume approximations of Burgers evolution equation	425-443
A. EL FARISSI, Z. DAHMANI AND Y. K. BOURAOUI : The Riemann-liouville operator to generate some integral inequalities	445-452
P. W. LING : The needed optimal cycle for prediction accuracy of stock price behavior in Taiwan by fractals theory	453-461
C. C. NWAIGWE : A renewal model with duration in a grade for manpower planning	463-469
R. SASIKUMAR : An enhanced applications of brownian motion to mathematical finance in stochastic modeling	471-481
C. H. CHANG : A Study of the company's internal staff and third-party performance evaluation	483-492
