# Journal of Interdisciplinary Mathematics

---

VOLUME 11      NUMBER 6      DECEMBER 2008      ISSN 0972-0502

---

## CONTENTS

MD. A. R. KHAN : An approximate likelihood of right censoring from Maxwell-Boltzmann distribution	753–769
F. O. IKPOTOKIN : Further development in multi-peg tower of Hanoi algorithms	771–786
S. K. MISHRA, J. S. RAUTELA AND R. P. PANT : Higher order type-I $\alpha$ -invexity and duality in non-differentiable mathematical programming	787–801
N. POCHAI, S. TANGMANEE, L. J. CRANE AND J. J. H. MILLER : A water quality computation in the uniform channel	803–814
A. L. PETRAKIS AND L. A. PETRAKIS : The type of the roots of the complete quartic equation	815–837
M. UNUAKHALU AND A. KUMAR : Teaching online programming courses using collaborative methods	839–849
D. F. HAIGHT : <i>Summa characteristic</i> and the Riemann hypothesis: scaling Riemann's mountain	851–901
<i>Index of Volume 11</i>	903–908
