

Journal of Interdisciplinary Mathematics

VOLUME 12 NUMBER 4 AUGUST 2009 ISSN 0972-0502

CONTENTS

G. W. GREENWOOD : Why operator-induced neighborhoods are a bad idea	451–455
L. CHITER AND Q. AL-HASSAN : Using a division procedure to predict and preserve potential optimality in the DIRECT algorithm	457–473
M. G. ZOIA : Closed-form expressions for the regular part coefficients in matrix polynomial inversion and related results	475–498
F. HOMAYRA, S. S. HOSSAIN AND A. KHAN : Sensitivity analysis of structural equation model with non-normal observed variables	499–513
A. MESÓN AND F. VERICAT : Super-exponential convergence of Gibbs states in iterated schemes lattice models	515–528
J. E. GOULIONIS : Timetabling the examinations of an entire university	529–536
I. BOCHICCHIO AND E. LASERRA : On the evolution of dust shells in Lemaître-Tolman-Bondi models	537–551
C. T. ARTIKIS AND P. T. ARTIKIS : Processes of educational informatics incorporating stochastic models	553–564
N. BULLE : Comparative analysis of inequality of opportunity: description versus explanation	565–588
S. SAENKARUN : Applications of representations of G_2 to solutions of a system of PDE	589–606
