

Journal of Interdisciplinary Mathematics

VOLUME 13 NUMBER 4 AUGUST 2010 ISSN 0972-0502

CONTENTS

- D. ŞAHİN AND T. ÖZER : Theoretical-group analysis of the inviscid gravity currents 355–376
- G. J. ZALMAI AND Q. ZHANG : Generalized $(\mathcal{F}, \beta, \phi, \rho, \theta)$ -univex functions and optimality conditions in semiinfinite fractional programming 377–405
- G. J. ZALMAI AND Q. ZHANG : Generalized $(\mathcal{F}, \beta, \phi, \rho, \theta)$ -univex functions and duality models in semiinfinite fractional programming 407–437
- P. G. KAZANTZIS AND C. D. DESINIOTIS : Four dipole problem stability of equilibrium points 439–454
- M. K. KUO AND M. J. LEE : Characterization of w -almost convergent sequences in $L^p(T^2)$ 455–462
- K. IWAMURA AND M. KAGEYAMA : Product credibility space with credibilistically independent fuzzy vectors 463–473
- C. W. CHAO, W. Y. LIN AND Y. A. LIU : The impact of the establishment of a captive insurance company on the risk characteristics of its parent company 475–490
