

**Journal of
Interdisciplinary Mathematics**

Index of Volume 2 (1999)

Number 1, February

- H. M. HASSAN AND H. M. SERAG : optimal control for quasi-static problem with elastic boundary conditions 1–6
- M. S. RAHMAN : A stochastic simulated first-order Markov chain model for daily rainfall at Barind, Bangladesh 7–32
- M. S. RAHMAN : Logistic regression estimation of a simulated Markov chain model for daily rainfall in Bangladesh 33–40
- L. Y. OUYANG AND B. R. CHUANG : A minimax distribution free procedure for (Q,R,L) inventory model subject to a service level constraint 41–55
- N. FAGHIH AND B. SOHRABI : Genetic algorithm in optimal preventive part replacement for minimum downtime maintenance planning 57–80
- G. H. LIN AND Z. Q. XIA : Some improved convergence results for variational inequality problems 81–88

Number 2-3, June-October

| | |
|--|---------|
| N. FAGHIH : An analysis and explanation of the uncertainty principle | 89–99 |
| I. P. PAVLOTSKY, M. STRIANESE AND R. TOSCANO : Prolongation of the integral curve on the singular set via the first integral | 101–119 |
| M. E. METAWEH : A concept of invariance and attractivity for multivalued differential equations | 121–127 |
| E. LASERRA AND G. MATARAZZO : A theorem of existence and uniqueness for the quasi-static problem in linear viscoelasticity | 129–142 |
| C. CATTANI AND E. LASERRA : Simplicial geometry of crystals | 143–151 |
| I. P. PAVLOTSKY, M. STRIANESE AND R. TOSCANO : Prolongation of the integral of Cauchy type on the curve of integration and the problem of its representation | 153–172 |
| H. A. LIU : A production lot size model for deteriorating items with inventory-level dependent production and demand rate | 173–183 |
| MD. A. U. KHAN : A zero-penalty stochastic control model and a new control policy for smuggling | 185–191 |
| P. SATTAYATHAM AND W. WEE : Use of cubic splines and the second central finite differences in numerical solution of PDEs | 205–206 |
| <i>Index of Volume 2 (1999)</i> | 205–206 |
