

Journal of Interdisciplinary Mathematics

VOLUME 6

NUMBER 2

JUNE 2003

ISSN 0972-0502

CONTENTS

D. B. ROWE : Bayesian source separation of functional sources	129-138
C. J. HUANG : Remarks on error bounds for EOQ	139-149
J. Y. LEE AND S. W. RHEE : Logistic modelling of normality by Receiver operating characteristic curves	151-158
Y. S. YEH, S. S. YU AND T. S. TSUI : The complete-tree-like matching mc-DFA and their implementation	159-181
S. K. VARMA AND H. R. TRIVEDI : Weighted k -ellipse of two types in probability space	183-188
T. TANAKA : The monotone condition for optimal multiple stopping problems	189-201
N. OKADA, K. IWAMURA AND Y. DEGUCHI : A computational study of a genetic algorithm to solve the set covering problem	203-218
L. CAROSI, J. JAHN AND L. MARTEIN : On the connections between semidefinite optimization and vector optimization	219-229
P. K. SAHOO : On a functional equation connected with a property of complex numbers	231-238
