## CONTENTS

G. M. SCARPELLO AND D. RITELLI : A nonlinear boundary problem by the inventory's optimization of a productive system with not wholly quadratic costs	133–145
T. TANAKA : A Fatou equation for a two-parameter stochastic process	147–156
T. TANAKA : Baxter-Chacon topology and vector-valued optimal stopping problems	157–164
T. TANAKA : Baxter-Chacon topology and optimality for multivariate stopping of two-parameter stochastic processes	165–177
M. Y. WANG AND T. S. LAN : The development of absolute motion analysis for spatial kinematics	179–193
S. KAWASAKI AND H. MORITA : On optimal scale upper bound in wavelet-based estimation for hurst index of fractional Brownian motion	195–214
A. KHEYFITS AND D. KHEYFITS : Fisher's $\alpha$ revisited: closed-form representation and computation	215–225
J. TOSCANO : An example of optimization of a combinatorial calculus	227–239
G. MATARAZZO AND L. BUONANNO : About boundedness conditions solutions hyperbolic equations with impulse perturbations	241–251
E. C. MARCOULAKI, G. P. BROULIAS AND G. P. CHONDROCOUKIS : Optimizing warehouse arrangement using order picking data and Monte Carlo simulation	253–263
B. YANG AND L. DEBNATH : On a new extension of Hilbert's double series theorem and applications	265–275
G. W. GREENWOOD : On the usefulness of accessibility graphs with combinatorial optimization problems	277–286
