

Journal of Interdisciplinary Mathematics

VOLUME 11 NUMBER 1 FEBRUARY 2008 ISSN 0972-0502

CONTENTS

A. S. SALAMA : Two new topological rough operators	1–10
F. NYABADZA : A deterministic model for church growth with internal revival	11–27
MD. R. ISLAM : Modeling age structure for female population in rural area of Bangladesh	29–37
F. FINESCHI AND R. GIANNETTI : Adjoints of a matrix	39–65
P. VLAMOS : Lower bounds of the blow-up time for reactions	67–75
M. KAGEYAM : On optimality gaps for fuzzification in finite Markov decision processes	77–88
H. BENAZZOUZ, M. MOULINE AND M. RACHIDI : On the Fibonacci Markov chains	89–98
M. FEDRIZZI AND V. VENTRE : Fraud measurement using ordered weighted aggregation	99–113
G. K. JANSSENS AND K. M. RAMAEKERS : On the use of bounds on the stop-loss premium for an inventory management decision problem	115–126
A. CANALE : L^∞ estimates for variational solutions of boundary value problems in unbounded domains	127–139
C. T. ARTIKIS, P. T. ARTIKIS AND P. HATZOPOULOS : Certain classes of discrete distributions in modeling risk control operations and establishing a transformation for probability generating functions	141–150
