

Journal of Information & Optimization Sciences

Index of Volume 1 (1980)

Volume 1, Number 1

C. W. HELSTROM : Detection of quantum signals by a mismatched receiver	1-20
T. KURISU : Singal machine general maximum cost problem with parallel-chain precedence constraints	21-26
D. M. MANDELBAUM : Some methods of detecting sequential errors in computer operation	27-40
R. CHANDRASEKARAN, S. KUMAR AND D. WAGNER : Critical path problem under assignment constraint-an application of an extreme point mathematical programming problem	41-51
A. CHARNES, S. DUFFUAA AND M. RYAN : Degeneracy and the more-for-less paradox	52-56
J. E. BILIKAM : Generalized life distribution parameterization and estimation	57-62
K. R. BALACHANDRAN AND J. A. LARGAY III : Gift and estate tax planning in the later years – an analytic approach	63-79
R. I. PHELPS AND L. C. THOMAS : On optimal performance in self-organizing paging algorithms	80-93
J. C. PANAYIOTOPOULOS : The multi-dimensional assignment model with provision for an uncertain future	94-101
<i>Dissertation Abstract</i>	102
<i>Announcements</i>	

Volume 1, Number 2

M. SAKAWA : Decomposition approaches to large-scale multiobjective reliability design	103–120
J. S. ROSE : Optimality of (s, S) -Policies in statistical inventory control	121–132
H. H. BALIGH AND W. W. DAMON : Foundations for a systematic process of organization structure design	133–165
G. JUMARIE : An approach to encoding in the presence of subjectivity	166–186
K. R. BALACHANDRAN AND J. A. LARGAY III : A mathematical programming model of lifetime gift and estate tax planning	187–195
<i>Dissertation Abstract</i>	196
<i>Announcements</i>	

Volume 1, Number 3

- D. M. LESKIW AND K. S. MILLER : Convergence properties in Kalman filtering 197–213
- T. NAKAI : Optimal assignment for a random sequence with an unknown parameter 214–228
- H. J. CLEFF AND W. GAUL : A stochastic flow problem 229–270
- B. MOND AND M. SCHECHTER : Duality in homogeneous fractional programming 271–280
- R. R. YAGER : On the cheating problem in Nash's bargaining model 281–290
- B. K. DASS : On a burst-error correcting code 291–295
- N. L. AGGARWAL AND B. BOUCHON : Minimum of h -divergence and maximum likelihood estimator 296–307
