

**JOURNAL OF
INFORMATION & OPTIMIZATION SCIENCES**

Index of Volume 17 (1996)

Number 1, January

D. P. COLUZZI : On a class of homographies of the hyperbolic plane on its spherical model	1-16
M. KODAMA : Some probabilistic inventory problems with various demand pattern	17-48
H. KUK AND D. S. KIM : Nonlinear programming with Hanson-Mond classes of functions	49-56
J. WOO AND M. M. ALI : Parametric estimation of two-parameter exponential model in the presence of unidentified outliers	57-63
T. NAKAI : Inventory model for deteriorating items with returns and disposals	65-84
T. NAKAI : Production management model for goods produced through many intermediates	85-96
C. SANTAGATA : Classical foundations of quantum postulates	97-126
E. MOLHO AND S. SCHAIBLE : Invexity of quadratic functions and restricted/local invexity	127-136
G. GIORGI AND A. GUERRAGGIO : Various types of nonsmooth invex functions	137-150
G. M. LEE, D. S. KIM AND B. S. LEE : Multiobjective control problems with invexity	151-160
G. M. LEE, D. S. KIM AND B. S. LEE : Some remarks on symmetric dual programs	161-165
G. K. JANSSENS : Analysis of the input to a buffer storage in front of a packet switch	167-175
A. H. JOARDER AND M. M. ALI : On the characterization of spherical distributions	177-184
H. J. CHANG AND D. H. LIANG : A randomized response procedure for two-unrelated sensitive questions	185-198
B. K. DASS, E. FOUNDAS AND P. TSIKOURAS : Random and burst error correcting linear codes	199-220
<i>Book Reviews</i>	221-222
<i>Announcements</i>	223-225

Number 2, May

B. M. AL-EIDEH : The extinction time of a diffusion model with beta-distributed catastrophe sizes	227–232
B. M. AL-EIDEH : Asymptotic normality of maximum likelihood estimators for non-parametric Markov chains	233–238
R. ROMANO : Generalized colourings for caterpillars	239–242
C. SINGH AND I. PRATON : Some variations, extensions, and generalizations of Tucker's theorems	243–253
S. INNAMORATI AND P. PERONI : Hyperclassification of remote sensing images	255–265
C. BELINGERI AND P. E. RICCI : On asymptotic formulas for the first zero of the Bessel function J_ν	267–274
Y. S. CHEN, Y. C. YEH AND K. C. CHEN : The exact distribution of cusum estimator of a changepoint in a Bernoulli sequence	275–290
M. TAMIZ AND D. F. JONES : Goal programming and pareto efficiency	291–307
C. CANEL AND B. KHUMAWALA : Application of facilities location to an insurance company's office reconfiguration	309–322
A. GALLO AND A. M. PICCIRILLO : $C^{0,1}$ -regularity for solution of variational inequality governed by two second order elliptic operators	323–342
F. R. SPENA AND A. VACCA : On the uniqueness of the solution to the direct nonlinear problem of physical networks	343–354
A. ELLERO : The optimal level solutions method	355–372
A. CAMBINI, A. MARCHI AND L. MARTEIN : On nonlinear scalarization in vector optimization	373–385
D. P. COLUZZI : On some properties of the hyperbolic plane directly on its spherical model	387–395
Y. KADOTA : Simultaneous recurrent conditions on countable state Markov chains	397–407
K. IWAMURA AND B. LIU : A genetic algorithm for chance constrained programming	409–422
T. NAKAI : A whereabouts guess problem with imperfect information	423–435
T. NAKAI : A game-theoretical approach to a regulation problem for illegal parkings	437–448
<i>Announcements</i>	449–451

Number 3, September

B. A. H. ABUL-HUDA : On relational multi-media systems – a survey	453–466
S. N. GUPTA, J. GOLDSTEIN AND C. YU : Fitting a fractional ARIMA model to time series data	467–483
H. ARSHAM : On the more-for-less paradoxical situations in linear programs : a parametric optimization approach	485–500
C. SANTAGATA : Black body and elliptic oscillator	501–520
H. A. MUTTLAK : Estimation of parameters in a multiple regression model using rank set sampling	521–533
S. D'ANDREA : A note on curriculum development and problem-solving in mathematics	535–540
A. A. EL-QASEM : Estimation via record values	541–548
A. LIM : Efficient algorithms to find optimal paths in a public transportation network	549–556
K. W. CHEN AND A. S. PAPADOPOULOS : Outlier detection trimmed means for poisson data	557–568
D. DU, A. LIM AND C. T. WU : Distributed algorithms for maximum cliques	569–583
V. PREDA, I. M. STANCU-MINASIAN AND A. BATATORESCU : Optimality and duality in nonlinear programming involving semilocally preinvex and related functions	585–596
<i>Announcements</i>	597–599
<i>Index of Volume 17 (1996)</i>	601–603
