

**JOURNAL OF  
INFORMATION & OPTIMIZATION SCIENCES**

**Index of Volume 18 (1997)**

**Number 1, January**

M. F. AL-SALEH : Estimating the mean of a normal population utilizing some available information : a bayesian approach	1-7
T. SEN AND F. M. E. RAISZADEH : An algorithm to minimize total flowtime and maximum job lateness in the two-machine flowshop system	9-16
S. CAVALIERI AND L. MILAZZO : A hypergraph theory-based approach to distributed system reliability evaluation	17-31
Y. HUANG AND M. KURANO : The LP approach in average reward MDPs with multiple cost constraints : The countable state case	33-47
R. CIMIKOWSKI : An analysis of heuristics for graph planarization	49-73
H. KUK, T. TANINO AND M. TANAKA : Trade-off analysis for vector optimization problems via scalarization	75-87
E. FOUNDAS AND M. GEORGIACODIS : On the construction of eulerian permutations	89-96
T. TANAKA : A matrix representation of fields and filtrations and its application to stochastic control problems	97-112
D. S. KIM, G. M. LEE AND B. S. LEE : On multiobjective symmetric dual programs	113-120
Y. KADOTA : Notes on variance in randomized reward Markov decision processes	121-129
T. NAKAI : A differential equation model for sales management of items with time limit	131-143
J. Y. LEE : Unidentifiable linear model analysis for medical models using derivative approach method	145-156
M. DE SALVO AND G. LO FARO : Wrapping graphs and partial semi-hypergroups	157-166
T. NAKAI : Production control model with a lead time for items with multi-period lifetime	167-175

A. H. JOARDER : On the characteristic function of the multivariate pearson type II distribution	177–182
A. LIM : Offset range problem for two blocks	183–187
A. K. BANSAL AND M. GANJI : Bayes estimation in a decapitated generalized negative binomial distribution and some of its applications	189–198
<i>Book Review</i>	199–200
<i>Announcements</i>	201–202
<b>Number 2, May</b>	
S. H. ABBAS : Jackknifing in regression	203–210
A. BURATTO AND B. VISCOLANI : Optimal study advertising plan for a knowledge/goodwill evolution process with rank memory	211–228
S. AL SALKHADI : Asymptotic results for inadequate nonlinear models with heteroscedastic variances	229–239
S. ABBAS : Robust designs based on auxiliary information	241–245
T. NAKAI : Optimal production management model under a restriction for utilizable materials	247–260
G. CHONDROCOUKIS AND E. FOUNDAS : A group decision support system design for a shiprepair facility	261–269
V. VAJNOVSZKI AND J. PALLO : Ranking and unranking $k$ -ary trees with a $4k-4$ letter alphabet	271–279
A. PANAYOTOPOULOS : Generating planar permutations	281–287
S. B. KANG AND Y. S. CHO : Estimation of the parameters in a pareto distribution by jackknife and bootstrap method	289–300
Y. KIMURA, D. KUROIWA AND K. TANAKA : An Equilibrium theorem for sub-differential	301–312
W. T. YANG, L. C. CHU AND N. W. GUO : A new approach for manipulating forrester diagram in system dynamics	313–335
D. S. KIM AND W. J. LEE : Generalized symmetric duality with inexity in variational problems	337–348
<i>Book Review</i>	349
<i>Announcements</i>	350

**Number 3, September**

F. M. ALI : Technique for solving multiobjective nonlinear programming using differential equations approach	351–357
K. L. MAK AND Y. S. WONG : A genetic approach to kanban assignment problems	359–381
S. B. KANG AND Y. S. CHO : Estimation of Gini index of the pareto distribution	383–392
P. G. TSIKOURAS : Generalized nested sets	393–398
P. CUBIOTTI AND J. C. YAO : On a general theorem of complementarity with applications to GCP	399–412
M. YASUDA : A Markov decision process with convex reward and its associated stopping game	413–421
B. A. H. ABUL-HUDA AND P. MAHNTI : Application of databases in discrete simulation data modelling	423–430
M. ZANNETTI : Self-dual sets	431–433
T. NAKAI : Optimal time allocation for using a common machine	435–445
G. FERRI AND J. LAHR : First and higher order model of the transmission line by the use of a ladder network and difference equations	447–452
E. N. PAPATHANASSIOU AND J. C. PANAYIOTOPOULOS : Some considerations on large distributed knowledge bases using concurrent programming : knowledge hills	453–461
M. C. MARINO : Generalized $s$ -distance colourings of a hypergraph	463–473
O. FERRI AND S. FERRI : On some caps of class $[1, m, n]_2$ in $AG(3, q)$	475–478
T. NAKAI : Stackelberg solution for a stopping game	479–491
S. N. GUPTA, J. GOLDSTEIN AND C. YU : Time domain estimation of long range dependence	493–498
<i>Index of Volume 18 (1997)</i>	499–501
