

# Journal of Information & Optimization Sciences

## Index of Volume 2 (1981)

### Volume 2, Number 1

I. WEGNER : Optimal Sequential Search with Discounted Income	1-18
R. L. MILLER : A Characterization of Weight-Preserving Automorphisms of Group Algebras	19-21
T. KURISU : A Note on a Two-Machine Flow-Shop Scheduling Problem with Precedence Constraints	22-27
J. S. KOWALIK AND Y. B. YOO : Implementing a Distributive Partitioning Sort Program	28-33
P. NARAYAN : The Least Positive Root of the Characteristic Equation $z = K(z)$	34-38
H. L. NAGEL : Combining Fictions Play with the Method of Determinants	39-44
W. GAUL : Bounds for the Expected Duration of a Stochastic Project Planning Model	45-63
M. D. ALI AND N. SINGH : Optimal use of Prior Information in Designing Experiments	64-72
M. E. SCHAEFER AND K. R. BALANCHANDRAN : Efficiency in the Reading of Water Meters	73-76
J-C. PANAYIOTOPOULOS AND K. TRIANTIS : Forming Special Groups of People	77-90
<i>Dissertation Abstract</i>	91
<i>Announcements</i>	92

**Volume 2, Number 2**

P. ADLER, JR., K. R. BALACHANDRAN AND R. E. GREEN : An Optimization Model for the Managerial Process	93-102
P. C. BAGGA AND K. R. KALRA : Single Machine Scheduling Problem with Quadratic Function of Completion Times – A Modified Approach	103-108
A. EL-SAYED : On Properties of Measures of Information	109-118
N. V. FINDLER AND J. P. MARTINS : On automatic Computer Model Construction – The Second Step toward a Quasi-Optimizer System	119-136
R. R. YAGER : An Exponential Model for Optimal Time Allocation in Decision Making	137-146
M. KUMARI : Concatenation Properties of $\delta$ -Sequences over GF(2)	147-160
J-C. PANAYIOTOPOULOS : Solving Linear Programs in Polynomial Time	161-168
T. NAKAI : Sequential Stochastic Assignment Problem with Rejection	169-180
J. NAKAGAMI AND M. YASUDA : A Saddle Point of an Inventory Problem	181-191
M. A. BEG : Estimation of the Tail Probability of the Truncated Pareto Distribution	192-198
<i>Book Review</i>	199-200

**Volume 2, Number 3**

F. PEZZELLA, R. BONANNO AND B. NICOLETTI : Modelling and optimization of local health units	201–220
E. MENIPAZ AND E. ENNS : On mobile service units : some mathematical considerations	221–235
O. D. ANDERSON : On forecasting certain misspecified models	236–240
P. JOLLY : Handling artificial variables in simplex method	241–248
G. PFLUG : On the convergence of a penalty-type stochastic optimization procedure	249–258
L. B. LEVITIN : A thermodynamic characterization of ideal physical information channels	259–266
K. R. KALRA AND P. C. BAGGA : Flow-Shop sequencing with no intramachine waiting minimization of total waiting cost	267–272
G. JUMARIE : A general paradigm for subjectivity in communication, subjective transinformation and subjective transuncertainty	273–296
H. L. BHATIA : Indefinite quadratic solid transportation problem	297–303
J. E. BILIKAM : Correction to “Generalized Life Distribution Parameterization and Estimation”	304
