

**JOURNAL OF
INFORMATION & OPTIMIZATION SCIENCES**

Index of Volume 20 (1999)

Number 1, January

K. J. CHUNG AND S. F. TSAI : A solution procedure to determine inventory replenishment policies for deteriorating items in a declining market	1-15
K. L. MAK AND Y. S. WONG : A machine requirements planning problem in the design of manufacturing systems	17-39
F. MERCANTI AND E. GELSOMINI : Multichannel digital systems and information theory II. Verification of an experimental result on the optimal perception	41-48
A. GALLO : A cauchy problem related to a second order non-linear evolutive system	49-73
G. FERRI : A novel approach for transmission line modelling by ladder networks	75-83
T. NAKAI : Optimal plan for using many common machines	85-103
J. Y. LEE : Quasiidentifiability analysis in linear compartmental medical models	105-112
M. RAHMAN AND B. G. LORICA : Attribute relative importance computation in conjoint analysis	113-120
B. A. STEAD AND B. KHUMAWALA : The global competitive edge : Waving the ISO 9000 banner	121-128
W. J. WAN AND P. CHU : Newton-Raphson method for the expected present value of total inventory costs	129-136
K. J. CHUNG : Bounds on the optimum order quantity in a DCF analysis of the EOQ model under trade credit	137-148
<i>Book Review</i>	149-150
<i>Announcements</i>	151-153

Number 2, May

T. SEN AND P. DILEEPAN : A bicriterion scheduling problem involving total flowtime and total tardiness	155–170
C. TOSONE : Bending under unilateral constraint : an analysis of the role of the elasticity constant	171–186
R. L. SHEU : A generalized interior-point barrier function approach for smooth convex programming with linear constraints	187–202
C. TOSONE AND A. MACERI : An unilateral problem of the structural engineering	203–213
R. PINI AND C. SINGH : Generalized convexity and generalized monotonicity	215–233
P. CHU AND K. L. YANG : Criterion for the optimal solution of an inventory model with a linear trend in demand	235–248
N. CROCKETTO AND L. TOSCANO : Numerical stability of two algorithms to compute sample standard deviation	249–258
X. ZHANG AND Y. YAMANE : Optimal design of model following control with uncertain disturbance by using genetic algorithms	259–270
L. CAROSI AND A. ZAFFARONI : On the existence of maximal elements for partial preorders	271–286
V. LEOREANU : New results on the hypergroups homomorphisms	287–298
M. C. PINAR : A characterization of the optimal set of linear programs based on the augmented lagrangian	299–308
M. H. AL-TOWAIQ : Asymptotic normality of maximum likelihood estimators for multiparameter Markov chains	309–312
<i>Announcements</i>	313–315

Number 3, September

T. C. HO, S. J. KAO AND I-EN LIAO : A new performance analysis model of local switching system with fuzzy control method for increasing call completion rate	317–346
K. IWAMURA AND B. LIU : Stochastic operation models for open inventory networks	347–363
P. CHU : A note on the distribution free procedures for some inventory models	365–372
A. S. BAKLIZI : A modified wilcoxon signed rank test for shift in location	373–380
P. S. TING AND K. J. CHUNG : Remarks on the hypercube model	381–385
J. Y. LEE AND S. W. RHEE : The Goodness-of-fit tests of normality by ROC curves	387–396
C. LIN, J. M. YEH, J. R. DING AND Y. LIN : On dynamic policies for quality, price and advertising	397–416
J. Y. LEE, J. S. WOO AND S. W. RHEE : Normality test by shewhart control chart	417–427
M. H. WANG : Approximation of optimal order policy for deteriorating items with a linearly increasing demand	429–442
<i>Book Reviews</i>	443–445
<i>Announcements</i>	447–448
<i>Index of Volume 20 (1999)</i>	449–451
