

**JOURNAL OF
INFORMATION & OPTIMIZATION SCIENCES**

Index of Volume 21 (2000)

Number 1, January

J. ZHANG : Mond-Weir type duality involving (B, η) -invex functions for a minmax programming problem	1-18
W. T. YANG AND W. H. LEE : A study on management performance of Taiwan high technology industry-the Hsinchu science park experience	19-44
B. A. H. ABUL-HUDA : Development of a knowledge based multimedia DBMS schema architecture	45-52
L. GIONRIDDO : The edge-coloring-property for steiner triple systems	53-59
E. ARAGNO : On the nonorientable genus of some generalized Petersen graphs $G(n, k)$ with $d = G.C.D.(n, k) > 1$	61-83
C. TOSONE : On an unilateral problem of thermo-elasticity	85-96
M. HOSAKA : Occupation measures in average cost Markov decision processes	97-112
M. S. CHEN AND C. C. CHEN : The impact of firm-firm externalities on environmental standard	113-128
T. NAKAI : Subjective games in a non-cooperative game	129-147
G. FERRI : Interconnection and transmission line modelling by half $-T/RC$ ladder networks	149-157
<i>Announcements</i>	159

Number 2, May

- J. WOO AND M. M. ALI : MSE-comparisons of bayes reliability estimators in a burr distribution 161–177
- H. J. CHANG AND Y. H. LEE : A comparative analysis of taipei housing model 179–192
- Y. P. CHU AND C. H. CHEN : A quantitative scheme to adjust the network topology 193–209
- J. W. WU AND R. YU : The optimal estimator of the common variance of the different populations with known kurtosis 211–220
- T. S. LAN AND C. H. LAN : On a comparison of objective function in optimal design of flexible production line with the unreliable machines 221–231
- C. PAGLIARI : Expectations and chaos in an aggregate economic system with intertemporal consumption choices 233–241
- G. GIORGI AND A. GUERRAGGIO : Nonsmooth vector-valued invex functions and applications 243–255
- S. G. TZAFESTAS AND G. G. RIGATOS : Self-tunning multivariable fuzzy and neural control using genetic algorithms 257–287
- B. ABUL-HUDA AND Y. ABU-RUKAH : Application of multimedia database system in detection and expectation of groundwater quality degradation : A case study–North Jordan 289–304
- U. MERLONE : The optimal level solution method applied to a non linear programming problem with exponential objective function 305–321
- L. BARONE AND G. Z. VOULGARIDIS : Observations on inverse Binomial Distribution 323–335

Number 3, September

D. FAVARETTOA AND B. VISCOLANI : A single season production and advertising control problem with bounded final goodwill	337–357
W. T. YANG AND L. C. CHU : A heuristic algorithm for the multi-depot periodic vehicle routing problem	359–367
E. LOUKIS AND G. CHONDROCOUKIS : A methodology for managing digital crises using risk analysis and contingency planning – Application for the case of the Y2K problem in the Greek public sector	369–384
C. SANTAGATA : Macrocosm and microcosm : an unexpected bond between elasticity theory and electron charge	385–401
P. DILEEPAN : Single machine scheduling with two job classes : Minimizing maximum lateness	403–413
O. FERRI, S. FERRI AND A GIALONARDO : On the quadric elliptic cones in a Galois projective space	415–420
P. CHU AND P. S. CHEN : A simple method to fit the Lanchester’s linear model for Ardennes champaign	421–427
H. J. CHANG AND K. C. HUANG : On estimation of ratio of population means in survey sampling when some observations are missing	429–436
H. KUK AND T. TANINO : On nonsmooth minimax programming problems containing $V - \rho$ -invexity	437–444
<i>Book Reviews</i>	445–448
<i>Index of Volume 21 (2000)</i>	449–451
