

**JOURNAL OF  
INFORMATION & OPTIMIZATION SCIENCES**

**Index of Volume 22 (2001)**

**Number 1, January**

Y. P. CHU AND R. J. HUANG : Call admission and bandwidth allocation for networks with bounded-delay services	1-22
E. LASERRA : Relative formulation of the relativistic cauchy problem for a charged continuum	23-34
S. B. KANG, Y. S. CHO AND S. H. CHOI : Estimation of the shape parameter for the three-parameter Weibull distribution	35-40
J. R. DING : Investigation of maintenance float problem using genetic algorithms	41-55
M. KODAMA AND M. SAKAGUCHI : Probabilistic analysis of dynamic inventory models with general demand pattern	57-72
M. S. CHEN AND M. L. TSAI : Solving dynamic model of environment pollution and sustainable development by the degenerate simplex method	73-90
Y. C. LIN AND J. M. YEH : A fuzzy controlled neural network for screening new product ideas	91-111
N. CROCETTO AND A. VETTORE : Best unbiased estimation of variance-covariance components : from condition adjustment to a generalized methodology	113-122
M. H. WANG AND P. S. CHEN : Goyal's inventory model revisited	123-128
M. S. CHEN AND C. H. LAN : Two-stage production plan of probabilistic market demand with unreliable machines and obtainable working hour capacity	129-144
P. S. CHEN : A note on the inventory model of Benkherouf	145-150
P. CHU AND P. S. CHEN : A simple verification for the $n$ -th moment of the backlog for the periodic review( $s, S$ ) inventory system	151-155

S. L. CHANG, K. J. CHUNG AND W. D. WANG : The $(s, Q)$ inventory system for fast moving items	157–168
J. Y. LEE AND C. R. CHU : Percentile envelope for detecting supernormality in regression analysis	169–176
R. ZHU AND Y. YAMANE : Design of robust controller without colliding for model following by using a genetic algorithm	177–190
A. P. PUNNEN : The traveling salesman problem : new polynomial approximation algorithms and domination analysis	191–206
<i>Book Review</i>	207

### Number 2, May

R. ROMANO : Study of $L(s, s)$ -colouring for caterpillars	209–212
L. Y. OUYANG AND B. R. CHUANG : $(Q, R, L)$ inventory model involving a service level constraint with defective items	213–225
A. MATURO : Finitely additive conditional probabilities with values on a hyperstructure	227–240
O. LIMARCHENKO, L. TOSCANO AND S. TOSCANO : Non-stationary problems of oscillations for elastic system with unilateral external interaction	241–248
H. C. TANG : A new lower bounding rule for permutation flow shop scheduling	249–257
Y. KADOTA, M. KURANO AND M. YASUDA : Stopped decision processes in conjunction with general utility	259–271
T. NISHIYAMA AND T. NAKAI : Effective strategies for a repeated prisoner's dilemma game	273–282
P. S. CHEN : On the minimum solution of the inventory system for deteriorating items with shortages and time-varying demand	283–295
Y. S. YEH AND J. S. CHOU : RC hash function	297–306
T. NAKAI : The information operation in a repeated $n$ -person nonzero-sum game	307–319

H. C. TANG : A modification to the CGPS algorithm for three-machine flow shop scheduling	321–331
T. NAKAI : An optimal liability rule for external diseconomies	333–343
J. WOO, C. LEE AND M. M. ALI : Right-tail probability estimation in the exponential model	345–356
L. Y. OUYANG AND H. C. CHANG : The effects of investing in lost sales reduction on the stochastic inventory models	357–368
Y. Y. WOO, S. L. HSU AND S. WU : Investing in ordering cost reduction for integrated inventory systems	369–381
S. L. CHANG, K. J. CHUNG AND W. D. YANG : The $(s, Q)$ inventory system for slow moving items	383–395
<i>Book Reviews</i>	397–399

### Number 3, September

F. R. SPENA AND A. VACCA : A minmax formulation of non-linear seepage flow problem	401–417
M. KODAMA AND M. SAKAGUCHI : Dynamic programming on the probabilistic inventory problems with multiple piecewise cost functions	419–440
M. G. HER AND K. S. HSU : Design and analysis of haptic direct drive robot for virtual reality	441–461
K. H. CHIU : A new password authentication mechanism based on two phases encryption	463–480
Y. S. YEH AND J. S. CHOU : Terminal pair maximal flow finding using DNA computation	481–493
K. S. WU AND T. C. HUANG : Optimal inventory replenishment model with time-varying demand, Weibull distribution deterioration and shortages under SFI policy	495–507
C. K. HUANG : An integrated inventory model for supplier and retailer with defective items	509–519
C. T. TSAO AND T. C. CHU : Personnel selection using an improved fuzzy MCDM algorithm	521–536

J. Y. LEE AND S. W. RHEE : Best choice for critical region in medical research	537-547
L. J. YEH, T. S. LAN, Y. T. CHEN AND W. Y. CHEN : Optimal approach for dynamic production control and workforce allocation of machining project	549-561
Y. S. YEH AND J. S. CHOU : Keyed/unkeyed RIPEMD-128, 192, 256	563-578
P. C. YANG AND H. M. WEE : A deteriorating inventory model with a temporary price discount : a present-value approach	579-595
<i>Index of Volume 22 (2001)</i>	597-600
