

## Journal of Information & Optimization Sciences

### Index of Volume 7 (1986)

#### Number 1, January

Obituary – Richard E. Bellman (1920–1984)	1–2
M. C. ER : Some variants of the weakest precondition in nondeterminism	3–8
M. C. ER : A formal derivation of an $O(\log n)$ algorithm for computing fibonacci numbers	9–15
H. J. WEINER : A random motion problem	17–27
H. A. EISELT AND C. L. SANDBLOM : On estimating optimal bases for linear programs	29–39
C. SINGH AND M. A. HANSON : Saddlepoint theory for nondifferentiable multiobjective fractional programming	41–48
P. JAIN AND R. K. TUTEJA : An axiomatic characterization of relative ‘useful’ information	49–57
S. K. WASAN : A note on weak-cyclic codes	59–64
T. WEIR : A note on strict converse duality in nonlinear programming	65–71
<i>Dissertation Abstract</i>	73–74
<i>Book Reviews</i>	75–80
<i>Announcements</i>	

**Number 2, May**

I. ALI, A CHARNES AND T. SONG : Design and implementation of data structures for generalized networks	81–104
M. C. ER : Generation, ranking and unranking of permutations based on the mixed-radix codes	105–111
M. C. ER : Lexicographical ordering of $k$ -subsets of a set	113–116
P. BAGCHI : Assessment of prior distributions based on information theory	117–128
M. GIONFRIDDO : On disjoint partial quadruple systems having seventeen blocks	129–136
G. H. LANDER : A Queuing model approach to stochastic supply/demand systems	137–144
G. H. LANDER AND A REINSTEIN : Accounting for inflation : past, present and future	145–176
C. A. BOTSARIS AND D. FAKINOS : Analysis and optimization of a loss service system with servers subject to random breakdowns	177–185
E. B. MANOUKIAN AND J. M. S. BOUFFARD : Sampling from a double-exponential distribution and efficiency of a test for a scale parameter relative to a normal one	187–195
S. R. DAS AND B. M. KHUMAWALA : Group technology and cellular manufacturing : An overview	197–207
K. M. HASSANEIN, A. K. MD. E. SALEH AND E. F. BROWN : Small sample quantile estimation of the normal distribution using optimal order statistics	209–225
U. KÖPPLER : 3-Error-Correcting goppa codes	227–234
M. I. TAKSAR : Optimal price and income regulation under uncertainty in the model with one producer	235–244
<i>Book Review</i>	245
<i>Announcements</i>	

**Number 3, September**

D. DUFFIE AND M. TAKSAR : Diffusion approximation in arrow's model of exhaustable resources	247-260
T. WEIR : A Dual for a multiple objective fractional programming problem	261-269
M. C. ER : The cyclic towers of hanoi and pseudo ternary codes	271-277
M. C. ER : A new programming technique derived from dijkstra's methodology	279-290
S. MILICI AND G. QUATTROCCHI : Some results on the maximum number of STSs such that any two of them interest in the same block-set	291-302
J. KAMBUROWSKI : A note on bounds for the moments of a stochastic project planning model duration	303-309
G. JUMARIE : Mixed theories of information can be derived by using shannon information only	311-321
C. R. BECTOR, S. RASHWAN, I. GOULTER AND J. GLANVILLE : A Goal programming approach to masonry construction	323-333
C. R. BECTOR AND S. CHANDRA : First and Second order duality for a class of nondifferentiable fractional programming problem	335-348
<i>Book Reviews</i>	349-353
<i>Index of Volume 7 (1986)</i>	355-356
<i>Announcements</i>
