

Journal of Information & Optimization Sciences

A Journal Devoted to Advances in Information Sciences,
Optimization Sciences and Related Aspects

VOLUME 24 NUMBER 1 JANUARY 2003 ISSN 0252-2667

CONTENTS

J. M. CHEN AND C. S. LIN : Optimal replenishment scheduling for inventory items with Weibull distributed deterioration and time-varying demand	1-21
T. C. TSENG, H. J. SHEU AND J. H. PAN : Goal-based incentive scheme using diagram analysis approach	23-48
K. J. CHUNG AND K. L. HOU : A solution procedure for (Q, r) inventory policies	49-59
J. W. WU : On determining the number of upper or lower outliers in normal sample by least squares procedure	61-71
D. KUROIWA : Existence theorems of set optimization with set-valued maps	73-84
K. J. CHUNG AND S. F. TSAI : A solution procedure to determine joint pricing and replenishment policy for deteriorating inventory systems with declining market	85-101
J. W. WU AND W. C. LEE : An EOQ inventory model for items with Weibull deterioration, shortages and time varying demand	103-122
P. DILEEPAN, F. M. E. RAISZADEH AND T. SEN : Minimizing total flowtime and maximum job lateness in the two-machine flowshop system : a computerized algorithm	123-135
C. CATTANI AND E. LASERRA : Wavelets in chemical transport theory	137-149
H. N. CHIU AND D. M. TSAI : An integer linear programming model and a modified branch and bound algorithm for the project material requirements planning problem	151-196
B. TAN, P. J. HSIEH AND C. LIN : Marketing policies on economic order quantity	197-210
