Journal of Information & Optimization Sciences

A Journal Devoted to Advances in Information Sciences,
Optimization Sciences and Related Aspects

VOLUME 30 NUMBER 2 MARCH 2009 ISSN 0252-2667

CONTENTS

T. T. LIN, C. B. CHEN AND T. H. LIU : Applying the real options approach to an optimal multi-stage acquisition model	201-214
T. T. LIN, P. C. HUANG AND K. C. YIP : The upper(lower) boundaries of RMB in net foreign exchange reserves with penalty cost	215-229
T. C. CHIANG AND F. J. YU : Improving real estate broker service using TOPSIS method	231-243
M. L. SHYU, K. H. HSU, Y. C. TU AND Y. F. HUANG : The EPQ model with random defective rate under service constraint without calculus	245-251
S. T. WANG AND W. T. LIN : A decision support system for supply parts planning of operation with uncertainty of supply and demand in the notebook computer industry	253-278
S. T. WANG, W. T. LIN AND L. C. WANG : Research on success factors of pharmacies using FDAHP and gray sequencing: Taiwan as Example	279-290
T. C. HSIA : Applying the integrated E-configuration management systems to improve logistics engineering	291-309
K. H. CHEN, J. T. WONG AND C. T. SU : Design of supply chain networks with multi-phased discount price and service level: formulation, complexity, and algorithm	311-334
J. T. WONG AND C. T. SU : A bi-level programming framework for stochastic replenishment policy in a supply chain: approach and computational test	335-357
K. J. CHUNG AND S. D. LIN : A theorem on the optimal cycle time for EPQ inventory model under permissible delay in payments	359-365
K. J. CHUNG AND S. D. LIN : Some comments on retailer's inventory model under supplier's partial trade credit policy	367-373
W. H. WU, C. T. LIN AND Y. J. CHIANG : Analysis of predicted frequency of miss of hospitals by using the Grey Model(1, 1) and control charts: case study of a medical center in Taipei city	375-385
W. J. LEONG AND M. A. HASSAN : Scaled memoryless BFGS preconditioned steepest descent method for very large-scale unconstrained optimization	387-396
