# Journal of Information & Optimization Sciences

A Journal Devoted to Advances in Information Sciences,  
Optimization Sciences and Related Aspects

---

VOLUME 31      NUMBER 1      JANUARY 2010      ISSN 0252-2667

---

## CONTENTS

|   |         |
|---|---------|
| M. J. YAO AND J. Y. HUANG : An optimal search algorithm for coordinating production and inventory of a deteriorating item in a supply chain system with a single-vendor and multiple-buyers | 1–36    |
| J. L. HU AND C. Y. FANG : Managerial efficiency of securities firms under the law-induced financial holding companies in Taiwan   | 37–62   |
| T. ANTczAK : G-saddle point criteria and G-Wolfe duality in differentiate mathematical programming  | 63–85   |
| S. P. HUANG : Using genetic algorithm in two-machine flexible flow-shop scheduling with setup times   | 87–103  |
| Y. C. WENG : The advertisement game solutions of manufacturers' noncooperative strategy – application of dynamic programming method   | 105–115 |
| Y. C. WENG : The optimal R&D and output strategy of the duopoly manufacturers   | 117–127 |
| Y. C. WENG AND J. W. SHY : The comparison of the forecasting models of the raw material futures' prices   | 129–145 |
| O. SKROCH AND K. TUROWSKI : Optimal stopping for the run-time self-adaptation of software systems   | 147–157 |
| S. Y. CHIANG, C. C. WEI, T. H. CHIANG AND W. L. CHEN : How does electronics industry face the lead-free manufacturing – the key indicators of lead-free manufacturing                       | 159–181 |
| M. T. CHENG : Effects of monetary policy on market volatility in Taiwan   | 183–188 |
| K. H. WANG, C. T. TUNG AND Y. J. LEE : EOQ model for deteriorating items with resalable returns   | 189–204 |
| Y. C. WENG : Optimizing advertising and quality strategies in an oligopoly  | 205–217 |
| A. K. C. MEI AND W. T. PAN : Apply genetic programming to build investment strategy model   | 219–229 |
| M. Y. LIAO AND C. W. WU : An alternative approach to control tool wear problem with an application to grinding wheels management in manufacturing silicon wafers                            | 231–244 |
