

**Journal of
Statistics & Management Systems**

Index of Volume 1 (1998)

Number 1, March

- D. UMBACH AND M. MASOOM ALI : Conservative spacing for the Fréchet distribution 1-9
- G. J. ZALMAI : proper efficiency principals and duality models for a class of continuous-time multiobjective fractional programming problems with operator constraints 11-59
- G. J. ZALMAI : Optimality principles and duality models for a class of continuous-time generalized fractional programming problems with operator constraints 61-100

Number 2-3, June-October

R. B. PATEL : Duality in multiobjective nonlinear fractional programs using augmented Lagrangian functions	101-114
K. V. RAMASWAMY : Single facility sequencing with variable processing times and costs	115-123
P. K. GARG AND D. BHATIA : A note on vector valued Lagrangian and multiobjective fractional programming duality via Dini derivatives	125-133
M. ZANNETTI : Optimality conditions and duality models for a class of nonsmooth continuous-time fractional programming problems	141-173
G. J. ZALMAI : Proper efficiency conditions and duality models for a class of nonsmooth continuous-time multiobjective programming problems	175-197
