

**Journal of
Statistics & Management Systems**

Index of Volume 2 (1999)

Number 1, March

- S. BAHL AND M. NAIN : Difference-cum ratio type estimators 1–8
- C. BERTOLUZZA, M. DI BACCO AND M. L. CAPODIECI : Bayes rule and expected utility rule: an unified axiomatic approach 9–21
- Y. C. CHEN AND M. S. CHEN : On the leadtime effect of two-stages production planning with random point demand 23–40
- M. MICOCCI AND A. TOMASSETTI : A comparison amongst different methods of calculation for probability distribution of actuarial cash flows 41–59
- T. E. SIMONS : Derivation of high order efficient numerical methods for $y'' = f(x, y)$ – a constrained optimization problem 61–72
- S. F. WU : Multiple comparison procedures with the average for k dependent normal means 73–95
- K. LOKHANDAWALA, N. H. SHAH AND Y. K. SHAH : A modification to: Optimal ordering policies when anticipating a disruption in supply or demand 97–102

Number 2-3, July-November

K. KUMAR : A time series analysis of Australian stock data	103–116
H. J. CHANG AND C. Y. DYE : An inventory model with stock-dependent demand under conditions of permissible delay in payments	117–126
S. S. RAO AND W. XIA : Measuring quality by process capability indices and the effects of non-normality	127–142
L. Y. OUYANG AND K. S. WU : Mixture Inventory model involving variable lead time and defective units	143–157
D. J. PARK : Prediction intervals in the simple linear regression model with balanced nested error structure	159–174
R. B. PATEL : On proper efficiency and generalized duality for vector fractional programs	175–185
R. B. PATEL : Semistrictly b -vex functions	187–197
H. A. LIU : A variable production scheduling policy for deteriorating items	199–210
<i>Index of Volume 2 (1999)</i>	211–212
