

**Journal of
Statistics & Management Systems**

Index of Volume 3 (2000)

Number 1, March

- L. Y. OUYANG AND B. R. CHUANG : (Q, R) inventory control involving a variable backorder rate 1-13
- M. S. CHEN AND C. C. CHEN : The effect of finite resource on environmental policy 15-27
- R. B. PATEL : On efficiency and duality theory for a class of multi-objective fractional programming problems with invexity 29-41
- M. GALEOTTI AND R. DIECI : A model of optimal financing decisions in a stochastic framework 43-66
- S. BAHL AND M. KUMAR : Estimation of finite population mean using multi-auxiliary variables 67-74
- L. Y. OUYANG AND H. C. CHANG : Quality improvement on lot size reorder point model with partial backorders based on limited information of demand 75-89
- M. S. CHEN AND C. C. CHUANG : A generalized newsboy problem with purchase timing 91-104

Number 2, July

- M. MASOOM ALI, J. WOO AND S. JEON : Umvue for series in scale parameter of a gamma distribution 105–111
- R. B. PATEL : Duality for multiobjective fractional variational control problems with (F, ρ) -convexity 113–134
- K. J. CHUNG AND K. L. HOU : The (s, Q) inventory system with customer line items backordered 135–148
- R. B. PATEL : Optimality and duality for generalized fractional variational control problems with (F, ρ) -convexity 149–170
- M. S. CHEN AND M. L. TSAI : A dynamic optimal model of sustainable development 171–191
- M. JAIN : $G^X/G^Y/I$ double ended queue: diffusion approximation 193–203
- H. J. CHANG AND M. C. LIU : Forecasting Taiwan stock price with corrected error term 205–214

Number 3, November

E. FOUNDAS : Permutations matrix	215–221
C. R. BECTOR AND M. SINGH : Vector valued bectovex programming	223–250
W. T. HUANG, L. C. YING AND Y. Y. CHUNG : A statistical technique to identify significant difference in examinees' abilities	251–268
A. AISSANI : An $M^X/G/1$ retrial queue with exhaustive vacations	269–286
C. BOUZA : Investigation of Burn-in problems with unknown failure time distribution	287–293
M. I. BHATTI AND I. H. KHANS : Complex verses Simplex model: An example of estimation using Bangladeshi agriculture data	295–304
<i>Index of Volume 3 (2000)</i>	305–306
