

**Journal of  
Statistics & Management Systems**

**Index of Volume 5 (2002)**

**Number 1-3, March-November**

A. RUBINOV AND Z. DZALILOV : Abstract convexity of positively homogeneous functions	1-20
M. ANDRAMONOV : A survey of methods of abstract convex programming	21-37
J. M. BILBAO AND J. E. MARTÍNEZ-LEGAZ : Some applications of convex analysis to cooperative game theory	39-61
S. SCHAIBLE : Fractional programming: a recent survey	63-86
J. RAMÍK AND M. VLACH : Concepts of generalized concavity based on triangular norms	87-106
S. KOMLÓSI : Farkas theorems for positively homogeneous quasiconvex functions	107-123
N. HADJISAVVAS : The use of subdifferentials for studying generalized convex functions	125-139
C. R. BECTOR AND R. CAMBINI : Generalized $b$ -invex vector valued functions	141-173
I. M. STANCU-MINASIAN AND V. PREDA : Optimality conditions and duality for programming problems involving set and $n$ -set functions: a survey	175-207

Q. H. ANSARI AND J. C. YAO : Generalized vector equilibrium problems	209–225
P. MAZZOLENI : Parametric preference structures	227–252
L. BRIGHI AND R. JOHN : Characterizations of pseudo-monotone maps and economic equilibrium	253–273
G. GIORGI AND A. GUERRAGGIO : Characterizations, comparisons, algebraic and topological properties of tangent cones	275–294
A. CAMBINI AND L. MARTEIN : First and second order optimality conditions in vector optimization	295–319
I. GINCHEV : Higher order optimality conditions in nonsmooth vector optimization	321–339
N. T. B. KIM AND D. T. LUC : Normal cone method in solving linear multiobjective problems	341–358
G. W. WEBER : Generalized semi-infinite optimization: theory and applications in optimal control and discrete optimization	359–388
<i>Index of Volume 5 (2002)</i>	389–390
