

Journal of Statistics & Management Systems

VOLUME 6

NUMBER 2

JULY 2003

ISSN 0972-5010

CONTENTS

Y. F. HUANG : The deterministic inventory models with shortage and defective items derived without derivatives	171-180
C. K. HUANG, C. H. LIN AND C. J. KUNG : An economic production-shipment strategy for the integrated vendor-buyer cooperative inventory model	181-192
Y. C. CHOU, P. L. CHANG AND M. G. HUANG : An inventory model for slow moving spare parts of semiconductor equipment	193-205
H. KUK AND H. J. KIM : Optimality conditions and duality for nonsmooth generalized fractional programming problems	207-215
M. Y. WU, H. RAU AND H. M. WEE : Exponentially varying demand for integrated inventory model with varying production of deteriorating item	217-227
K. J. CHUNG AND K. L. HOU : The determination of the optimal safety stock of the (s, Q) inventory system for slow moving items	229-240
M. S. CHEN, C. LIN AND C. C. LEE : Determining employee operation hours in general hospital with expected service level	241-252
K. L. YANG, S. K. LIANG AND P. CHU : A note on the inventory model with time-varying demand and shortages	253-261
H. J. CHANG AND C. L. WANG : Analysis of voting percentage in the Mayor election of Taipei by Multinomial Logit Model	263-279
M. BJØRNDAL AND K. JØRNSTEN : Prices in a combinatorial auction	281-293
G. J. ZALMAI : Parametric sufficient optimality conditions and duality models for minmax fractional subset programming problems with generalized $(\mathcal{F}, \rho, \theta)$ -convex functions	295-330
G. J. ZALMAI : Parametric sufficient efficiency conditions and duality models for multiobjective fractional subset programming problems with generalized $(\mathcal{F}, \rho, \theta)$ -convex functions	331-370
