## CONTENTS

T. TANAKA : The accessibility and multiple filtration structure for discrete time multiparameter optimal multiple stopping problems	221-235
C. J. HUANG : The convexity and bounds on optimal cycle time for the EOQ model with obsolescent items	237-251
C. T. LIN AND C. R. WU : Real options and the choice of foreign production strategy between two countries	253-267
Y. F. HUANG : Retailer's economic ordering policy with finite replenishment rate when delay in payments is permissible	269-282
M. Y. WANG AND H. Y. CHANG : The optimum of tool geometry on surface roughness in end milling AL2014-T6	283-294
K. S. WU AND H. F. YEN : Optimal design of a heuristic inventory model	295-307
Y. H. CHIU, D. B. SHEN AND C. M. MA : Small business lending and bank cost efficiency	309-323
K. J. CHUNG AND T. S. HUANG : A simple algorithm to determine the optimal inspection interval	325-333
W. Y. WANG : Integrated inspection strategy model with inspection errors and positive inspection time lengths	335-348
B. DALAMAGAS : Fiscal policy and labour market : testing the reliability of the neo-classical business cycle model	349-395
K. V. RAMASWAMY AND M. SMITH : Impact of processing time and related costs on optimal lot sizing in manufacturing	397-402
S. W. CHIU, Y. P. CHIU AND H. C. CHAO : Materials procurement decision-making based on the economic order quantity model and the economic production quantity model	403-415
M. M. ALI AND J. WOO : Approximate estimation of the shape parameter in a gamma distribution	417-423
B. VISCOLANI : New product introduction : determining optimal advertising policies	425-442
